In view of the amendment and remarks filed on October 11, 2004, the pending claims are unpatentable as following:

Claim Objections

1. Claim 1 is objected to because of the following informalities: the phrase "the carbon containing particle" lacks antecedent basis. Such phrase is originated from claim 6. Appropriate correction is required.

Applicant is suggested to incorporate claim 6 into claim 1 and change the dependency of claim 7.

Allowable Subject Matter

2. The following is a statement of reasons for the indication of allowable subject matter: the prior art does not teach having any silicon carbide particles in the polymer films.

3. The following claim 1 is drafted by the examiner and considered to distinguish patentably over the art of record in this application, claim 1 now is presented to applicant for consideration:

Claim 1. A multilayer film structure for absorbing electromagnetic wave, comprising: a plurality of polymer films having a multi-film stacking structure, wherein the polymer films are composed of a carbon group compound structure, wherein the carbon group compound structure comprises a carbon containing particle, wherein the carbon containing particle comprises a silicon carbide particle, and a plurality of permeability films formed on each surface of the polymer films.

Double Patenting

4. Claims 1-7 & 10 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-8 of copending Application No. 10/711,664. Although the conflicting claims are not identical, they are not patentably distinct from each other because they are structurally and materially the same.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

5. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).
